Amorim Industrial Solutions Signs Agreement to Install CFJ HandHeld ERP®

Trevor, WI – Amorim Industrial Solutions <http://amorimsolutions.com>, an Amorim Group company and world leader in all Cork products, is specialized in CorkRubber development, production and distribution.

Amorim Industrial Solutions has signed an agreement to install **CFJ HandHeld ERP®** to eliminate paper and automate their Receiving and Shipping operations, using bar coded Purchase Order (PO) Receipts and Shipping transactions.

As the Trevor, Wisconsin location has been migrating from a production function to a distribution function for some time, increasing productivity became an important focus.

Amorim Industrial Solutions uses WorkWise, Inc. <http://www.workwiseinc.com> Enterprise Resource Planning (ERP) system TCM version 6.2.1, running on Windows.

Christoph Fryer Jaskie, Inc. <http://www.cfjinc.com> developed **CFJ HandHeld ERP®**. It is an innovative software product that extends an ERP system to the physical location where the work is being performed, eliminating the need for paper, increasing the velocity of information and eliminating errors. **CFJ HandHeld ERP®** is unique. Previously, data collection systems moved information from the floor to the ERP system, in one direction. **CFJ HandHeld ERP®** works bi-directionally, delivering information from an ERP system and receiving information into the ERP system.

About Christoph Fryer Jaskie, Inc. (www.cfjinc.com)

CFJ is a consulting firm with extensive expertise in ERP systems. **CFJ HandHeld ERP®** is unique in the market, because it extends a distributors, or manufacturers, ERP system out to the floor where the work is actually being performed. The software application eliminates paper in the warehouse, factory floor or loading dock. **CFJ HandHeld ERP®** software runs on mobile computers running Microsoft's Pocket PC™ operating system. **CFJ HandHeld ERP®** is designed to work with all ERP systems. Christoph Fryer Jaskie, Inc. currently has a patent pending for **CFJ HandHeld ERP®**.

About Amorim Industrial Solutions (www.amorimsolutions.com)

Amorim Industrial Solutions is a Company committed to quality and innovation, demonstrated by continuous investment of resources in R&D, ensuring that Amorim Industrial Solutions products meet or exceed world-market requirements. Through investments in key companies, the Amorim Group has contributed significantly to the strategic advancement of CorkRubber. To maximize its potential, the Group established an independent business unit to promote this area: Amorim Industrial Solutions.

About WorkWise, Inc (www.workwiseinc.com)

WorkWise is a customer-centric solution provider of the Time Critical Manufacturing® (TCM™) enterprise application. In addition to the TCM Enterprise Application, WorkWise provides a full range of offerings, including Customer Support, Consulting, Technical and Integration Services. WorkWise offers solutions to make-to-order, repetitive and mixed-mode manufacturers to shorten cycle times, reduce inventory and improve customer service. Companies that require solutions that simplify and optimize manufacturing information, supply chain management, manufacturing execution and planning can enhance their operations through use of TCM by taking time out of the business processes and increasing value-add in products and services.
